**CHARLES "CHIP"
BLANKENSHIP**

HEADQUARTERS

Appliance Park is a 900-acre facility that houses executive offices, manufacturing operations, a technology and engineering center, industrial design operations, and the largest distribution warehouse in the company's network.

Today, Appliance Park produces washing machines and dryers, hybrid water heaters, commercial and residential air conditioners, dishwashers, and bottom-freezer refrigerators.

ADDITIONAL MANUFACTURING SITES

GE Appliances also operates manufacturing facilities at three additional locations:

DECATUR, AL

Produces top-freezer refrigerators

LAFAYETTE, GA

Produces cooking products*

SELMER, TN

Produces built-in refrigerators*

OTHER OPERATIONS

In 1987, **Mabe**, a joint venture, was created by GE and Mexican entrepreneurs. Mabe currently makes bottom-freezer and side-by-side refrigerators, cooking products, and dryers for GE Appliances.

GE Appliances' **distribution network** includes nine distribution centers with 130 additional cross-dock locations in the United States.

GE Appliances has a **network of call centers** located in Louisville, Kentucky; Rapid City, South Dakota*; and Memphis, Tennessee*.

FirstBuild™, a global co-creation community and **state-of-the-art microfactory** in Louisville, enables product innovation through small-batch production without the cost and risk of traditional mass manufacturing*.
