

Teenage Sexual Intercourse, Birth Rate and Licensed Child Care: A Resource Gap Analysis for Albuquerque, New Mexico

University of New Mexico Center for Education Policy Research

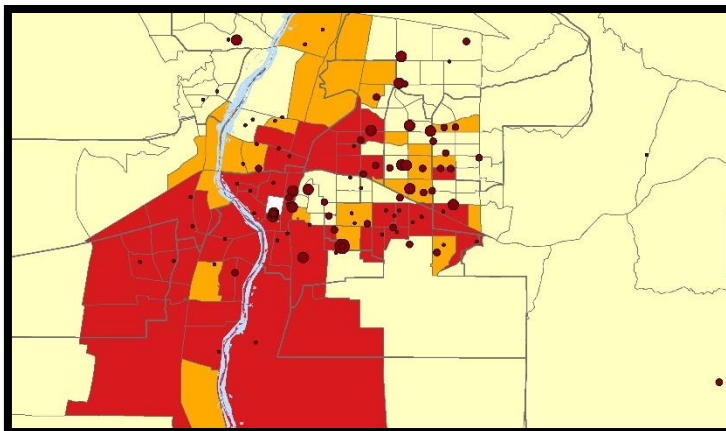

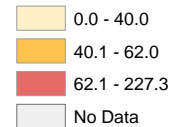

This exploration begins with identifying which high schools have the highest rates of self-reported sexual activity among students. This map shows the data by high school. Borders indicate attendance boundaries.

Percent of Teens Who Report Having Sex

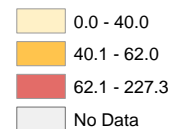

Teen birth rate data is shown here by census tract. You can see higher rates evident in the southwest part of the city.

Teen Birth Rate, 15-19, Per 1000

Here we see that licensed four and five star child care centers are concentrated in the east northeast part of the city, where there are fewer teen births. Capacity may need to be increased in this area.

Teen Birth Rate, 15-19, Per 1000

Licensed Child Care Dot size indicates capacity
