

INSPIRING THE CREATIVE LEAP

Chances are, the world's best-selling musicians heard their most famous tracks played back for the first time through AKG® studio headphones. Music professionals have relied on AKG for almost 70 years, producing some of the most nuanced and natural-sounding headphones and microphones in the history of audio. It's no surprise, then, that AKG's achievements include over 1,400 International patents and a 2010 technical GRAMMY® award.

AKG exists to tap into the creativity in all of us, and we engineer our products to deliver sound just as the artist intended. Every little intricacy is exposed and its true character revealed. This is pure studio sound, free of distortion and distraction for a superior listening experience. An experience that brings a heightened clarity and focus to the listener. Authentic sound with a mind-clearing effect that inspires people to go off and create.

SAMSUNG x AKG

FOR A SUPERIOR LISTENING EXPERIENCE

Samsung and AKG kicked off their collaboration by bringing AKG's superior listening experience to Samsung Galaxy devices. The Samsung Galaxy Tab S3 debuted with quad stereo-sound speakers tuned by AKG. Galaxy S8 smartphone users will be able to enjoy pure, natural sound with in-pack earphones tuned by AKG.
