CLARI-FI™ TECHNOLOGY BRINGS MUSIC BACK TO LIFE

- Clari-Fi automatically analyzes and improves audio quality
- It transforms the listening experience, by restoring lost signal
- Delivers a rich, uncompressed listening experience from any music source
- Clari-fied music sounds clearer, crisper, wider, and more dynamic being more faithful to the original recording

HIGHLIGHTS

- 9 speakers
- 8-channel DSP amplifier producing 800 equivalent watts
- Two compact, lightweight, next-generation coaxial speakers reproduce high and middle frequencies
- Two large woofers with acoustic lenses for improved sound dispersion throughout the vehicle
- Within its own enclosure, the subwoofer delivers deep, clear, low-frequency effects and optimizes response for the entire system
- Newly designed JBL wave guides, known as horn tweeters, provide a cleaner sound over a wider area
