

Phillip Miller, Senior Director of Product Management

Phillip Miller is senior director of product management at NVIDIA, and is responsible for NVIDIA's commercial rendering products.

Miller joined NVIDIA in 2008. He possesses over 20 years of experience guiding industry-leading software products at companies like Autodesk and Adobe.

Miller is a registered architect with a Masters of Architecture from the University of Illinois, and has written a number of books on 3D modeling, animation, and rendering.

John O'Brien, Senior Director of Real Estate and Site Services

John O'Brien is senior director of real estate and site services at NVIDIA. He oversees all operational management, including facilities maintenance, food service, employee amenities, and real estate portfolio management. O'Brien is responsible for the development of NVIDIA's new campus.

Prior to joining NVIDIA in 2012, O'Brien served as president of Guthrie Real Estate, where he oversaw acquisition, due diligence, property management, and development activities. He previously was a broker for the industrial division of Grubb and Ellis, as well as the director of asset management and project director with Burke Real Estate Group.

O'Brien served in the United States Marine Corps for 25 years, retiring as a lieutenant colonel. He served in combat in Iraq in 2003, and is the recipient of multiple medals, including the Naval Achievement Medal and Naval Commendation Medal.

O'Brien earned his Bachelor of Science degree in social sciences from the University of California, Irvine, and a Master of Arts degree in business from Webster University, in St. Louis, Mo.

Hao Ko, Principal and Design Director

Hao Ko is the principal and design director on the NVIDIA Headquarters project in Santa Clara, California.

Grounded by the belief that the fundamental role of an architect is to elevate the human spirit, Ko strives to design beautiful places – ones that inspire people and impact the way they live, work and play. Always pursuing a high level of conceptual thinking, pushing performance boundaries, and detailed in execution and craft, Ko has just recently completed the Tower at PNC Plaza in Pittsburgh, Pennsylvania. Coupling a progressive workplace design to a unique and innovative passive, natural ventilation strategy driven by a breathable double-skin façade and solar chimney, this transformational project is designed to be the world's greenest high rise building.

Ko carries a design-first, people-centric approach into his leadership role as both design director and studio director for the architecture practice in Gensler's San Francisco office.

In 2012, Ko received multiple under-40 awards, including the prestigious American Institute of Architect's Young Architect award. Ko is a graduate of Harvard University's Graduate School of Design and the University of California, Berkeley.
