

Energy Drawings: STEAM in Action

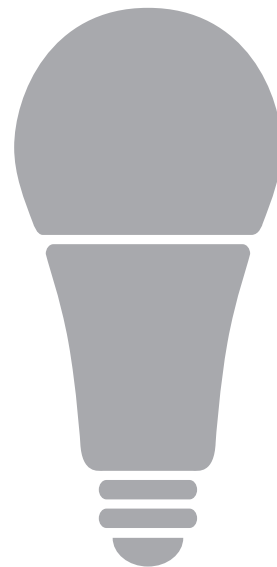

Recreate the images below on the canvas of your choice: a sidewalk using chalk, paper using markers or crayons, or even on a window using dry-erase markers. Use your creativity and the possibilities are endless!

Nuclear power supplies carbon-free energy.

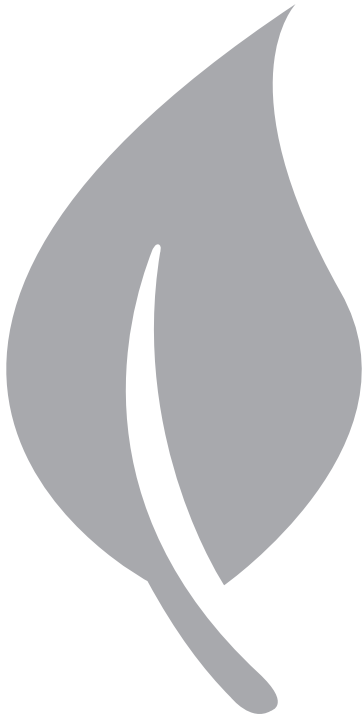

Transmission lines carry power to substations and neighborhoods.

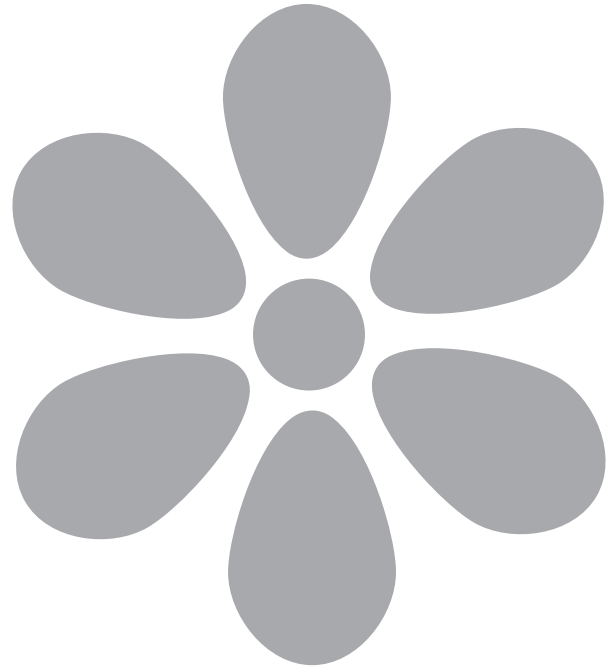

LED bulbs save energy and money.

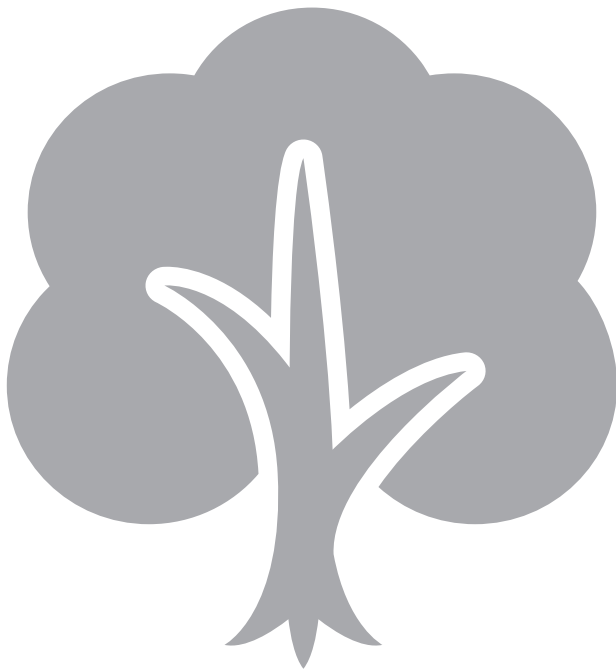

BUILDING A SMARTER ENERGY FUTURE®

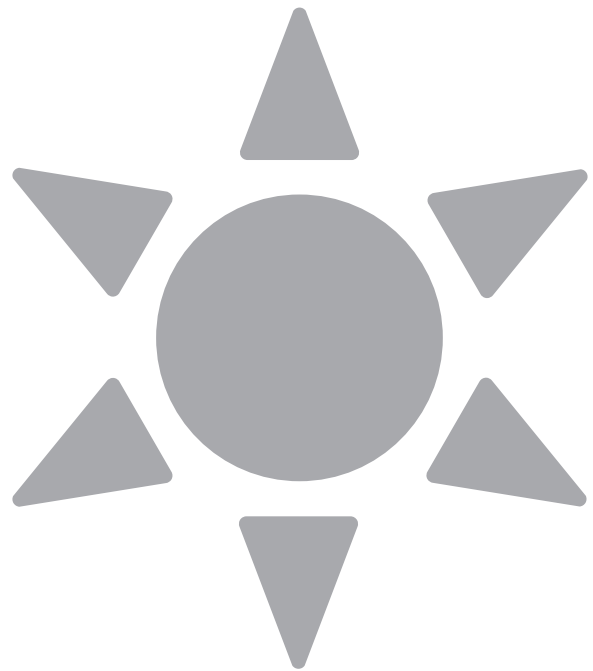

Clean energy includes nuclear, solar, hydro and wind energy.

Saving energy is good for the environment.

Clean energy protects the environment.

Solar power is a clean source of energy.
